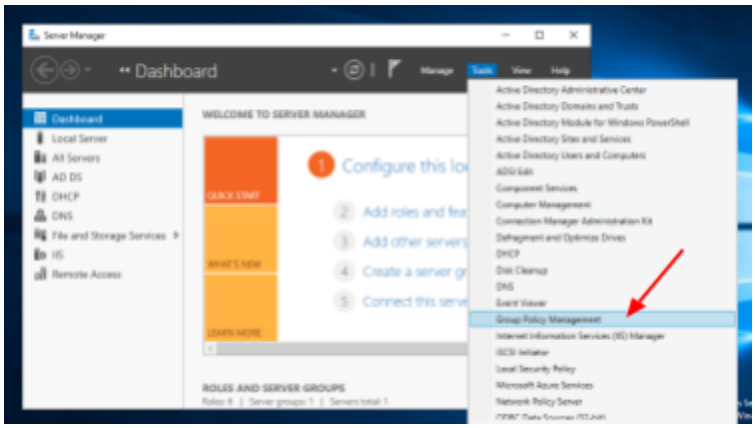
Adding Wallpaper GPO to Active Directory

Using DC and VM via VirtualBox

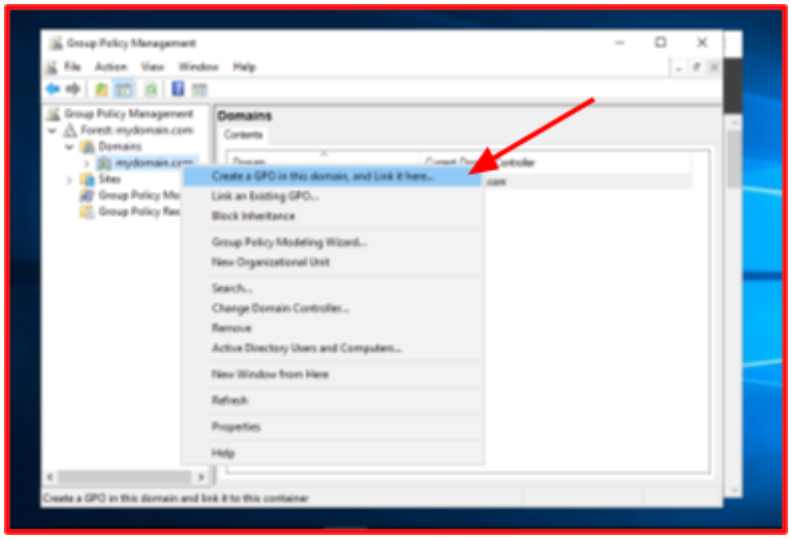
Before starting I set up a new folder named Wallpaper in DC-
In C: drive with file name 25 jpg

Steps Taken

1. Open the DC and VM
2. On the DC Go to Tools > Group Policy Management.

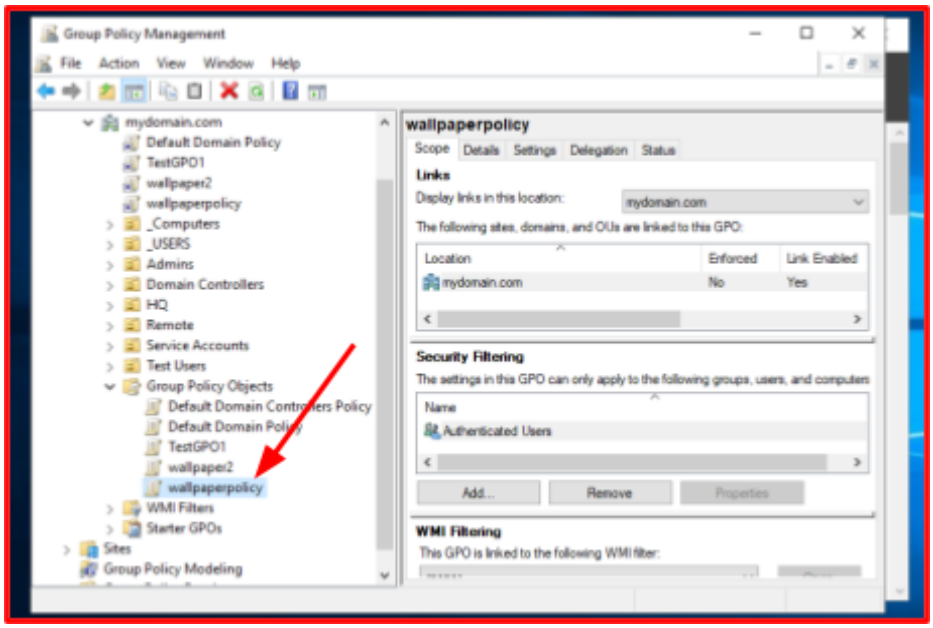


3. Expand Domain Forest > Domains > Right Click On “your domain”
Choose - Create the GPO in this domain and link it here.

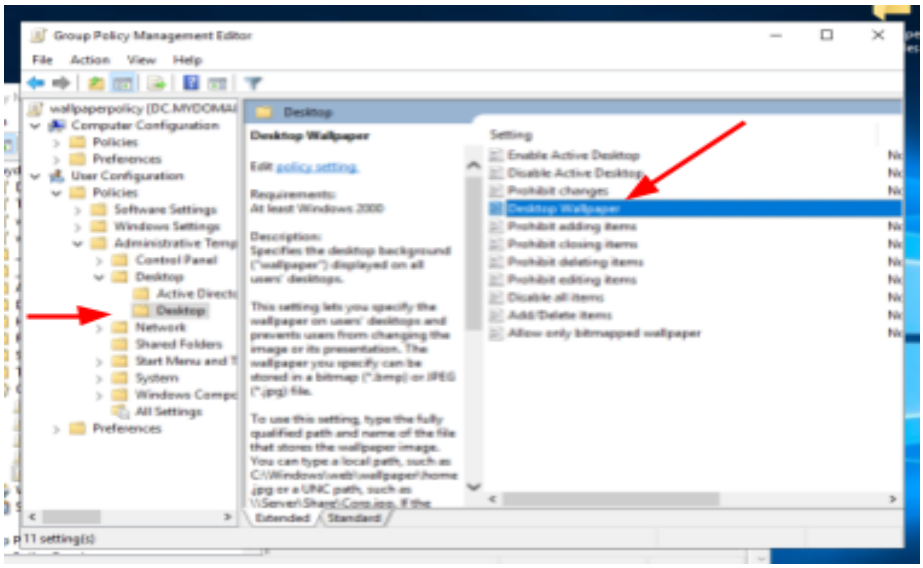


4. Create a name for your GPO Example:Wallpaper or wallpapertest click enter

5. Expand your DC dropdown. > Group Policy objects > right click and choose edit.



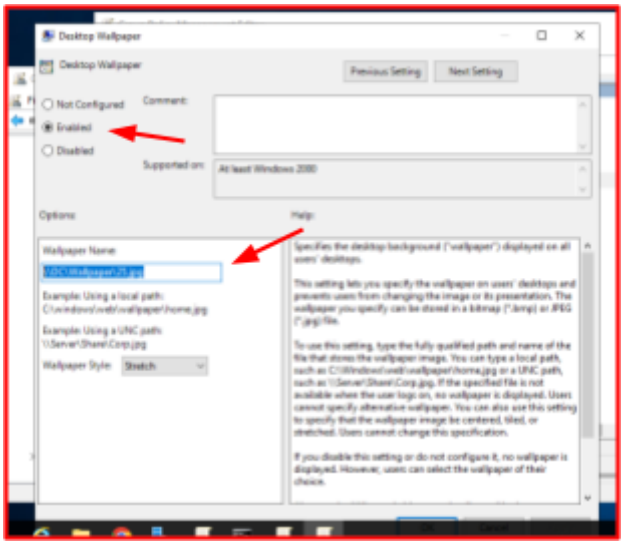
6. Go to User Configuration > Policies > Administrative Templates > Desktop >Desktop > Desktop
Wallpaper — *Right Click Desktop wallpaper and choose edit*



7. Click Enabled- In the Wallpaper Options box enter the file path where your wallpaper file is located. -NOTE THIS FOLDER MUST HAVE SHARED ACCESS In the file format \\<Hostname>\<ShareName>\<Filename>

Example:
Hostname DC
Sharded folder Wallpaper
Filename 25.jpg
Would be
\\DC\Wallpaper\25.jpg

ON wallpaper style I chose stretch



8. Open virtual machine and log in with a user account to confirm the GPO was applied.
